

# HARRIS WOOD

Long-standing tradition meets new-age trend

Quality material, precise craftsmanship

Environmentally efficient

Made in the USA vs. far away

## 2009 PRODUCT COLLECTION

# WHAT COULD BE MORE GREEN...

# ...THAN WOOD

In a time where so many brands and organizations are joining the “green movement,” we are already there. Almost no other product comes closer to the essence of “green” than wood. We manufacture our flooring from carefully selected domestic and imported species. As a result,

Harris Wood provides one of the most environmentally sound flooring options available today.

- Our floors are made only through strict preservation and replenishment programs. We are certified by the International Forest Stewardship Council to handle FSC Certified Wood.
- Hardwood floors can be refinished rather than replaced, preserving them for generations. They are durable, hypo-allergenic and biodegradable.
- The effort continues in our very own plant through energy efficient processes. We recycle saw dust and remnants of wood as fuel for our boilers, providing energy for our plant to operate.
- Unlike most other material choices for flooring, wood is a natural and renewable resource and the ultimate environmentally friendly building material available.
- Harris Wood will continue to commit to preserving the environment; from the replenishment of the forests we use, to the smallest of the products we recycle in our offices.
- When printing product literature or even the very labels on our sample boards, we choose only paper products from those certified by the FSC.

Since 1898, Harris Wood has been manufacturing quality hardwood flooring with a commitment to quality materials and precise craftsmanship. The legacy of Harris Wood, an American company founded on traditional customer service, is based right at home in Johnson City, TN.

Our 2009 Product Catalog includes collections in an array of colors, finishes, widths and textures across multiple wood species. The distinctive collections are manufactured using cutting - edge technology with an eye on today's trends. From our stylish "painted" series to our long - standing traditional products, we are committed to stand out from the ordinary.

# Moldings and Transitions

At Harris, we make complementing premium real wood moldings and transitions to coordinate with all our real wood floors, so why go anywhere else?

## Quarter Round

Covers the expansion gap near the wall and can be used with a base molding.

## Stair Nose

Gives steps a finished look by completing the change from wood flooring to stair steps, allowing them to blend seamlessly.

## Reducer Strip

Allows a transition between floorings or different heights.

## T-Mold

Finishes off the area between two hard-surfaced floors of equal height seamlessly and easily.

## Square Nose Reducer

Provides a graceful transition from a new wood floor to carpet; use this molding to finish the expansion space at sliding glass doors, stairs or hearths.

## Baby Threshold

Transitions between different flooring types such as wood and tile.

## Selection Guide

### **E**ngineered

- Quarter Round
- Reducer
- Stair Nose
- T-Mold
- Baby Threshold

### **S**olid

# Care and Maintenance

Ready - to - use **Harris No Wax Floor Cleaner** aids in maintaining the natural beauty of real wood floors and all other types of no-wax urethane finished floors. It removes many spots and stains with no effect to the Aluminde® finish, including cola, lemon juice, lipstick, milk, crayon, mouthwash, mustard, coffee, ketchup, mineral spirits, and shoe polish. Even especially tough stains such as nail polish can be removed with no harm to the flooring using nail polish remover.

## For the Life of Your New Floor

- Keep a doormat inside and outside entrances to minimize tracked-in grit
- Remove remaining grit or dirt by vacuum or dust mop
- Use **Harris No Wax Floor Cleaner** to keep flooring looking like new
- Never use water on a hardwood floor
- Wipe spills immediately with a damp cloth or rag
